Neoplastic Gastrointestinal Pathology
An Illustrated Guide
Laura W. Lamps, MD
Andrew M. Bellizzi, MD
Wendy L. Frankel, MD
Scott R. Owens, MD
Rhonda K. Yantiss, MD

Approximately 20 million gastrointestinal tract biopsies are performed each year in the United States. While many of these are straightforward, some are histologically subtle or involve a complex differential diagnosis. This concise visual guide to the full range of neoplastic gastrointestinal specimens provides the practicing pathologist or trainee with a clear analysis and diagnosis of both common and potentially misleading variants of disease. The authors cover the full tubular GI tract with over 600 high-quality images and a concise description of the key features of each entity: definitions and terminology, gross and morphologic features, differential diagnoses, useful ancillary tests, staging and grading parameters, and special clinical considerations. Images depict differential diagnosis features, frequently seen variants that can potentially lead to misclassification or misdiagnosis, and correlated molecular and immunologic techniques.

Cytopathology Case Review
Christopher J. VandenBussche, MD, PhD
Syed Z. Ali, MD, FRCPath, FIAC

Pathology residents, fellows, and practitioners will welcome this cytopathology review of carefully selected case scenarios drawn from the Johns Hopkins case archive. Each illustrated case scenario contains multiple-choice questions along with detailed explanations and references. Authored by distinguished faculty at Johns Hopkins University, the helpful review covers all major topics within cytopathology. Each clinical case scenario includes representative images and clinical history, diagnostic question, and detailed discussion supported by thoughtfully selected key references. Cases are presented in random order to maximize their teaching and review value and can also be accessed by method and site.

Atlas of Soft Tissue and Bone Pathology
With Histologic, Cytologic, and Radiologic Correlations
Leslie G. Dodd, MD
Marilyn M. Bui, MD, PhD

This is an abundantly illustrated resource for diagnosis of bone and soft tissue lesions—a particular challenge due to their rarity and complexity. In addition to carefully selected histologic photographs, this unique atlas enhances standard visual information with illustrations of imaging findings, cytology, and molecular and cytogenetic information. This vivid pictorial survey is arranged in a pattern-oriented approach based on the actual working method used in daily practice.

Clinical Diagnostic Tests
How to Avoid Errors in Ordering Tests and Interpreting Results
Edited by Michael Laposata, MD, PhD

Clinical Diagnostic Tests is a convenient, quick-reference guide to common errors and pitfalls in test selection and result interpretation for practitioners and trainees in all areas of clinical medicine. Authored by recognized experts and educators in laboratory medicine, it provides timely, practical guidance about what to do and what not to do for practitioners ordering or interpreting clinical tests. Each topic features a concise overview and summary followed by a list of bulleted standards of care that will enable practitioners to quickly recognize and avert a potential problem.

July 2015 • 310 pp.
Paperback • 9781620700839 • $55.00

Diagnostic Standards of Care

A key issue for every laboratory and individual laboratory practitioner is the assessment of risk and a current working knowledge of the standards of care established for diagnostic testing via guidelines, major studies and trials. The Diagnostic Standards of Care series presents an overview of the key diagnoses in clinical pathology using case examples to illustrate effective analysis of the case in light of current evidence and standards for the problem discussed. In addition to being practical diagnostic guides, these volumes will have a unique emphasis on quality assurance and evidence-based testing practices and the role of the pathologist in ensuring quality and patient safety.

“I must admit to great enjoyment each time I receive a new book in this series. This book upholds the strong quality and standards of previous volumes. This packs a wallop of helpful information. Get it. Learn from the errors of others to directly suffer without having the consequences yourself.”

—Doody’s Reviews, [Clinical Chemistry]
Demos Cytopathology Atlases
Series Editor Syed Z. Ali, MD, FRCPath, FIAC

These generously illustrated, user-friendly atlases for both cytopathologists and surgical pathologists are practical guides to the diagnostically challenging area of cytopathology. Each volume includes hundreds of high-resolution color images that thoroughly illustrate the important aspects of the cytopathology.

FEATURED TITLE

Atlas of Gynecologic Cytopathology with Histopathologic Correlations
Christopher J. VandenBussche, MD, PhD
Syed Z. Ali, MD, FRCPath, FIAC
Dorothy L. Rosenthal, MD, FIAC
Russell Vang, MD

Not only does the Atlas feature concise, expert descriptions of the full range of cytopathologies in the gynecological tract, it also presents and contrasts problematic pathologies that can potentially lead to erroneous interpretation. Over 500 carefully chosen, high-resolution color images illustrate crucial aspects of gynecologic tract disease, and selected images of the histopathologic and gross characteristics of the lesions enable morphologic correlation. Additionally, the book features a special chapter authored by a gynecological expert on the colposcopic characteristics of cervical lesions, along with a brief review of the updated ASCCP management guidelines emphasizing a multidisciplinary approach.

July 2015 • 216 pp. • Hardcover • 9781620700440 • $145.00

Atlas of Thyroid Cytopathology With Histopathologic Correlations
Syed Z. Ali, MD, FRCPath, FIAC

Hardcover
9781936287697 • $155.00

Atlas of Urinary Cytopathology With Histopathologic Correlations
Syed Z. Ali, MD, FRCPath, FIAC
Tehmina Z. Ali, MD
Jonathan I. Epstein, MD

December 2009 • 248 pp.
Hardcover
9781933864662 • $165.00

Atlas of Pancreatic Cytopathology With Histopathologic Correlations
Syed Z. Ali, MD, FRCPath, FIAC
Yener S. Erozan, MD
Ralph H. Hruban, MD

March 2009 • 224 pp.
Hardcover
9781933864402 • $165.00

“The Atlas of Pancreatic Cytopathology with Histopathologic Correlations is a beautifully illustrated and well written practical atlas of pancreatic cytopathology. Novice and experienced cytopathologists alike will appreciate the high quality images and excellent accompanying legends.”

—Doody’s Reviews
Consultant Pathology
Series Editor, David E. Elder, MB, ChB

The Consultant Pathology series is designed to disseminate the knowledge of expert surgical pathology consultants in the analysis and diagnosis of difficult cases to the full community of pathology practitioners. The volumes are based on actual consultations and presented in a format that illustrates the expert’s process of evaluating the case, including indications for consultation, the consultant’s findings and comments, and discussion of the entity that amplifies the case description.

Each volume in the Consultant Pathology series is authored by international experts with extensive case experience in the areas covered.

Superficial Melanocytic Pathology
David E. Elder, MB, ChB
Sook Jung Yun, MD, PhD

Superficial Melanocytic Pathology provides expert guidance for resolving the real world problems pathologists face when diagnosing melanomas and other atypical pigmented lesions. It reviews each major category of atypical melanocytic lesions, including the pathology of the superficial categories of melanoma followed by a discussion of the major simulants of melanoma.

November 2014 • 352 pp.
Hardcover • 9781933864938 • $175.00

Breast Pathology
Melinda E. Sanders, MD
Jean F. Simpson, MD

Based on actual cases drawn from the extensive breast pathology consultation practice at Vanderbilt University Medical Center, Breast Pathology covers the full classification of breast tumors and focuses on especially challenging differential diagnoses or unusual and problematic morphologic presentations. Using a pattern-based approach, each case is presented as a difficult diagnostic choice with two or even three possible diagnoses for the pathologist.

The book presents a foreword by David L. Page, MD, Professor of Pathology, Vanderbilt University Medical Center.

March 2014 • 324 pp.

Hardcover • 9781933864562 • $190.00

Intraoperative Frozen Sections
Diagnostic Pitfalls
Pedram Argani, MD
Ashley Cimino-Mathews, MD

Intraoperative Frozen Sections presents diagnostic challenges involved in the evaluation in the pathology lab of specimens obtained during surgery through the case experience of expert pathologists. Sixty-three problems cover the wide range of problems encountered in intraoperative consultations. Each presentation provides the case information as presented to the consultant, the evaluation and analysis of the specimen, discussion of the results and teaching points observed in the case, and an overall comment providing additional context for the diagnostic problem that has been presented.

July 2013 • 296 pp.
Hardcover • 97819338627970 • $169.00

“_This unique book provides insight into the minds of experienced practicing pathologists_ and advice on how to better phrase frozen section diagnoses so as to avoid inappropriate surgical management._”

—Doody’s Reviews
The Demos Surgical Pathology Guides series presents in summary and visual form the basic knowledge base that every practicing pathologist needs every working day. Series volumes cover the major specialty areas of surgical pathology, and coverage emphasizes the key entities and diagnoses that pathologists will see in practice, and that they must know whether in training or practice.

Liver Pathology
Shu-Yuan Xiao, MD
Kiyoko Oshima, MD

*Liver Pathology* covers the key entities and diagnoses that pathologists see in daily practice, focusing on the salient H&E histopathology of each entity with concise descriptions of clinical features, differential diagnosis, and references for further study.

- September 2014 • 123 pp.
- Paperback • 9781620700075 • $85.00

Prostate Pathology
Debra L. Zynger, MD
Anil V. Parwani, MD, PhD

*Prostate Pathology* concentrates on the salient H&E histopathology of each entity discussed with brief descriptors of the clinical features, differential diagnosis, and relevant literature references for each entity. The book features a bulleted format with H&E illustrations to match histopathologic criteria.

- August 2014 • 208 pp.
- Paperback • 9781936287901 • $85.00

Pulmonary Pathology
Nagarjun Rao, MD, FRCPaht
Cesar A. Moran, MD

Intended for busy practitioners, *Pulmonary Pathology* is a pithy, pocket-sized guide to key pulmonology entities and diagnoses that pulmonologists see in daily practice.

- February 2014 • 200 pp.
- Paperback • 9781936287345 • $85.00

4 Stars

“Overall, this book represents an excellent quick-reference guide for pathologists looking for basic clinical, histological, and immunohistochemical information for cutaneous neoplasms.”

—Doody’s Reviews [Neoplastic Lesions of the Skin]
Neoplastic Mimics

Hundreds of color images and analysis of diagnostic mimics guide the pathologist through recognizing and distinguishing the unusual variants, morphologic anomalies, and misleading features that may easily lead to an inaccurate interpretation and missed diagnosis.

Neoplastic Mimics in Soft Tissue and Bone Pathology
With Histologic, Cytologic, and Radiologic Correlations
Vickie Y. Jo, MD, Jason L. Hornick, MD, PhD
This book, which contains more than 300 images, provides the pathologist with detailed morphologic descriptions and diagnostic guidance in recognizing these neoplastic mimics as they occur in the soft tissues and bones. In addition, descriptions and diagnostic guidance are provided for the range of lesions that are considered benign neoplasms but may mimic malignant tumors.
November 2015 • 200 pp. • Hardcover • 9781620700518 • $150.00

Neoplastic Mimics in Gastrointestinal and Liver Pathology
Arief Suriawinata, MD
This book provides the pathologist with detailed morphologic descriptions and diagnostic guidance in recognizing these mimics as they occur in the gastrointestinal system and liver. In addition, descriptions and diagnostic guidance are provided for the range of lesions that may mimic benign masses but are in fact neoplastic.
August 2014 • 264 pp. • Hardcover • 9781620700365 • $175.00

Neoplastic Mimics in Genitourinary Pathology
Peter Humphrey, MD, Robert H. Young, MD, J. Carlos Manivel, MD
This book provides the pathologist with detailed morphologic descriptions and diagnostic guidance in recognizing these neoplastic mimics as they occur in the genitourinary system. In addition, descriptions and diagnostic guidance are provided for the range of genitourinary lesions tumors that may mimic benign masses but are in fact neoplastic. The points that contribute to differential diagnosis are emphasized.
October 2013 • 272 pp. Hardcover • 9781620700204 • $169.00

Neoplastic Mimics in Thoracic and Cardiovascular Pathology
Mark R. Wick, MD, Henry D. Tazelaar, MD
Since many of the entities described are uncommon, Neoplastic Mimics in Thoracic and Cardiovascular Pathology emphasizes imaging and clinical correlations throughout to support the pathologist as consultant to the entire diagnostic and clinical management team.
March 2013 • 242 pp. Hardcover • 9781620700136 • $190.00

Neoplastic Mimics in Dermatopathology
Mark R. Wick, MD, James W. Patterson, MD
This book provides the pathologist with detailed morphologic descriptions and diagnostic guidance in recognizing these neoplastic mimics as they occur in the skin. In addition, descriptions and diagnostic guidance are provided for the range of skin lesions that may mimic benign masses but are in fact neoplastic.
February 2013 • 208 pp. Hardcover • 9781620700129 • $175.00
