The Must-Know Points of Medical Oncology Distilled into a Single Source for Targeted Board Review, Self-assessment or Handy Quick Reference

Oncology Boards Flash Review
Francis P. Worden, MD, Associate Professor of Internal Medicine, Director, Division of Hematology/Oncology Fellowship Program, University of Michigan Medical School

Coverage extends across the range of major hematologic malignancies and solid tumors, as well as reviews of pharmacology, biostatistics, genetics and tumor biology, and survivorship and palliative care. Each topic is consistently presented with the key points summarized in bullet point form for easy recall. Question-based headings enable the reader to systematically review and assess his knowledge. This study guide covers all the basic points of medical oncology that you must know.

 CONTENTS: Hematologic Malignancies; Acute Leukemias; Myelodysplastic Syndromes; CML and Myelo-proliferative Disorders; Hodgkin’s Disease; Multiple Myeloma and Plasma Cell Dyscrasias; Non Hodgkin’s Lymphoma; Non Hodgkin’s Lymphoma; CLL; Aerodigestive Malignancies; Non small cell lung cancers; Small cell lung cancer; Mesothelioma; Thymic carcinoma; Head and Neck cancers and salivary gland tumors; Endocrine Malignancies; Thyroid cancer; Adrenocortical carcinoma and Pheochromocytomas; Breast Cancer; Breast cancer; Genitourinary Malignancies; Bladder cancer; Germ cell tumors; Prostate cancer; Renal cell carcinoma; GI Malignancies; Gallbladder and biliary tree malignancies; Colorectal cancers; Anal cancer; Esophageal cancer; Gastric cancer; Pancreatic cancer; Hepatocellular carcinoma; Neuroendocrine tumors; Sarcoma; Soft tissue sarcomas and desmoid tumors; CNS Malignancies; Cancers of Unknown Primary; Pharmacology; Pharmacology of cancer drugs and agents; Biostatistics; Genetics and Tumor Biology; Supportive Care/Palliative Care; Melanoma; Gyn Malignancies

December 2012 • 256 pp. • Softcover • 978-1-936287-81-9 • E-book ISBN 978-1-617051-30-2 • $45.00/$38.25

NEW AND FORTHCOMING TITLES 2012

A Comprehensive Learning and Self-Assessment Tool

Radiation Oncology Self-Assessment Guide
Edited by John Suh, MD, Professor and Chairman, Department of Radiation Oncology, Taussig Cancer Institute, Cleveland Clinic, Cleveland, Ohio

Organized by site, Radiation Oncology Self-Assessment Guide covers in detail all the sites and cancer types currently treated with radiotherapy. Detailed questions, organized in a “flash-card” format are included on the natural history, epidemiology, diagnosis, staging, treatment options and treatment-related side effects for each cancer type allow the reader to thoroughly assess his knowledge of the field and identify strengths as well as areas need further study and preparation. The discussion of the questions includes key literature citations reinforcing the reader’s knowledge of critical studies and guidelines in the field. Written in joint collaboration by residents and staff radiation oncologists at the Department of Radiation Oncology at the Cleveland Clinic Taussig Cancer Institute, the book contains more than 900 questions addressing the full gamut of the science and art of radiation oncology today.

Provides the Practitioner with an Innovative Program to Guide from Cancer and its Treatment

Manual of Cancer Treatment Recovery
What the Practitioner Needs to Know and Do
Stewart Fleishman, MD, Former Director of Cancer Supportive Services at the Continuum Cancer Centers of New York and the Associate Chief Medical Officer of Continuum Hospice Care-Jacob Perlow Hospice

“...Addresses the important issues of survivorship, with an emphasis on starting recovery right from the initial diagnosis. Several helpful worksheets for patients help them focus on what is important to them and how to communicate that to the health professionals guiding their care.”—Doody's Reviews

Manual of Cancer Treatment Recovery presents the first comprehensive program to guide the recovery from cancer and its treatment. The Manual helps you, other practitioners, and your staff members plan early intervention and promote healing right from the start, before distressing symptoms begin. Manual of Cancer Treatment Recovery teaches how to guide patients and families in setting up a simple plan that minimizes treatment’s unwarranted effects, how to coordinate with other clinicians involved in the patient’s management; and how to develop a directed survivorship program in your practice. Divided into three sections, the book covers what everyone needs to know about survivorship, how to implement effective and enduring care, and how to work with patients utilizing The LEARN System (Living, Education, Activity, Rest, Nutrition) that Dr. Fleishman developed.

The book also includes easy-to-use forms that patients may complete even before the initial consultation and post-treatment survivorship care plans for primary care providers. Whether used independently or in conjunction with Dr. Fleishman’s patient-focused companion book Learn to Live Through Cancer, the Manual of Cancer Treatment Recovery enables the oncology care team to anticipate patient and family needs even before they arise.

The Manual Will Help You To:
△ Organize recovery plans during treatment to improve quality of life
△ Develop an innovative system to minimize loss of vital energy, lean body mass, and distress before they happen
△ Develop a survivorship program for your practice
△ Coordinate oncology care with specialists and primary care providers
△ Integrate end-of-life issues into the care trajectory
△ Improve patient care during and after treatment
△ Nurture your patients’ recovery preventively and systematically

December 2011 • 256 pp. • Softcover • 978-1-936303-08-3 • E-book ISBN 9781617050626 • $18.95/$38.25

An Easy-to-Read and Understand Guide for Cancer Patients and Their Families

Learn to Live Through Cancer
What You Need to Know and Do
Stewart Fleishman, MD, Former Director of Cancer Supportive Services at the Continuum Cancer Centers of New York and the Associate Chief Medical Officer of Continuum Hospice Care-Jacob Perlow Hospice

Learn to Live Through Cancer: What You Need to Know and Do presents a step-by-step guide to improve the length and quality of life for cancer survivors, helping them to manage the variety of physical, emotional, and spiritual issues they face proactively.

In Learn to Live Through Cancer: What You Need to Know and Do cancer survivors will learn how to evaluate their condition, improve their communication with healthcare providers, research their illness and treatment options, seek complementary therapies when necessary, improve overall health habits, tend to their emotional well-being, and continue to monitor the long-term success of their survivorship program. The book is a complete guide to getting a person with cancer through that critical time from diagnosis to remission and on with their life. It is an inspirational, cutting-edge book that provides a roadmap to a healthier and meaningful future following a cancer diagnosis.

2011 • 360 pp. • Softcover • 978-1-936303-08-3 • E-book ISBN 9781617050626 • $18.95/$38.25

An American Journal of Nursing “Best Consumer Heath Book 2011”
Tumor Board Reviews
Guidelines and Case Reviews in Oncology
Edited by Robert F. Todd, III, MD, PhD, Chair of Medicine, Baylor College of Medicine, Kathleen A. Cooney, MD, Chief of Hematology/Oncology, Michigan University School of Medicine, Teresa Hayes, MD, Assistant Professor of Oncology, Baylor College of Medicine, Martha Pritchett Mims, MD, Chief of Hematology/Oncology, Baylor College of Medicine, and Francis P. Worden, MD, Clinical Associate Professor of Oncology and Fellowship Director, Michigan University School of Medicine

“...Extremely helpful in refreshing my memory on a broad range of treatments. This is a very high yield and extremely easy to read review. The discussions include recent clinical trial data and well-designed treatment paradigms”—Doody’s Reviews

Tumor Board Reviews provides comprehensive coverage of all topics in oncology. Each topic is introduced with a short overview, followed by a sequence of specific presentations organized by disease classification. Each disease classification includes a concise summary of current practice standards followed by a “tumor board” case presentation. These case presentations demonstrate clinical applications and are accompanied by expert comment and teaching points drawn from the case.

The combination of guideline summaries with cases illustrating clinical applications is unique. Guidelines (mostly issued through NCCN) are issued and updated continually but often there is no real explanation of how they should be applied. The combination of guidelines summaries with case discussions make this volume a clear understanding of applications of new information for use in daily practice.

FEATURES OF TUMOR BOARD REVIEWS INCLUDE:
△ Comprehensive coverage of all areas of oncology
△ Presentation of most recent guidelines and management standards in concise, user-friendly format
△ In depth “tumor board” presentations showing clear clinical applications
△ Special focus on indications and use of new drugs, and treatment of new side effects
△ Expert analysis and commentary

December 2011 • 400 pp • Hardcover • 978-1-936287-17-8
E-book ISBN • 978-1-617050-46-6 • $95.00 / $80.75

A Timely and Thorough Review of the Neurologic Complications of Anti-Cancer Treatments

Neurologic Complications of Cancer Therapy
Editors: Patrick Y. Wen, MD, Director, Division of Neuro-Oncology, Brigham & Women’s Hospital, and David Schiff, MD, Co-Director, Neuro-Oncology Center, University of Virginia, and Eudocia C. Quant, MD, Neurology Fellow, Brigham & Women’s Hospital

Neurologic side effects of cancer therapy can inhibit treatment, can be dose-limiting and can diminish quality-of-life. Neurotoxicity related to cancer therapy is a common problem in oncology practice and in clinical neurology. Recognition of neurologic complications of anticancer therapy is necessary due to potential confusion with metastatic disease, paraneoplastic syndromes or comorbid neurologic disorders that do not require reduction or discontinuation of therapy.

Neurologic Complications of Cancer Therapy provides comprehensive coverage of the recognition and management of neurologic symptoms related to cancer therapy. The book includes sections on systemic therapy discussed by both agent and adverse event. The section on adverse events is particularly valuable to clinicians, allowing them to consult by symptom in cases where multiple agents have been administered and the source of the complication is uncertain. The systemic therapy section includes coverage of immunologic agents, biologics, and targeted therapies. The book also features sections on the complications of radiation therapy, complications of surgery and high-dose chemotherapy, and stem cell transplantation.

NEUROLOGIC COMPLICATIONS OF CANCER THERAPY FEATURES:
△ A widely recognized team of editors
△ Systemic therapy covered by therapeutic agent and by adverse event, enabling a “problem-oriented” approach for the clinician
△ Coverage of newer modalities including immunologic agents, biologics, and targeted therapies
△ Complete sections on complications of radiation therapy, surgery, high-dose chemotherapy, and stem cell transplantation

2011 • 350 pp • Hardcover • 978-1-932687-07-9 • E-book ISBN • 978-1-617050-19-0 • $99.00 / $84.15
Emerging Cancer Therapeutics VOLUME 2, 2011

EDITOR-IN-CHIEF: Jame Abraham, MD, FACP, Bonnie Wells Wilson Distinguished Professor and Eminent Scholar, Chief, Section of Hematology-Oncology, and Medical Director, Mary Babb Randolph Cancer Center, West Virginia University

Published three times a year Emerging Cancer Therapeutics provides authoritative, thorough assessments of advances in therapies in all major areas of oncology, both solid and hematologic malignancies, with a focus on advances in medical and biological therapies with emerging clinical impact and encompassing new technologies with implications for management such as molecular imaging. Emerging Cancer Therapeutics is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.

FEATURES OF EMERGING CANCER THERAPEUTICS INCLUDE:

△ Editorial board of nationally recognized experts across the spectrum of Cancer Therapeutics

△ In-depth, up-to-date expert reviews and analysis of major new developments in all areas of Cancer Therapeutics

△ Issues edited by an authority in specific subject area

△ Focuses on major topics in Cancer Therapeutics with in-depth articles covering advances in clinical and translational research developments, as well as clinical applications and experience

Melanoma

Guest Editor: William H. Sharffman, MD, Associate Professor of Oncology, Associate Professor of Dermatology, Johns Hopkins School of Medicine

Melanoma provides a comprehensive review for practitioners on the current status of melanoma treatment. Due to recent drug approvals and increasing ability to offer combined agents, there are many more treatment options available to melanoma patients than even a few years ago. Especially significant are the recent FDA approval of the immunotherapeutic agent ipilimumab for metastatic melanoma, and new agents targeting the BRAF gene in malignant melanoma.

There is also coverage of the most recent data pertaining to surgical management, staging and prevention, and melanoma in children.

December 2012 • 224 pp. • Hardcover • 978-1-936287-79-6 • E-book ISBN 978-1-617051-61-6 • $86.00 / $72.25

Lymphoma

Guest Editor: John Sweetenham, MD, Professor of Medicine, Medical Director, UCSD Nevada Cancer Institute, Las Vegas

This volume in Emerging Cancer Therapeutics provides a comprehensive review for practitioners on the current status of lymphoma subtypes. All of the chapters in Lymphoma are written by international experts in the field, address current management across the spectrum of lymphoma subtypes and are multidisciplinary in scope. Uniquely Lymphoma provides a disease subtype-specific review of new and emerging therapies for lymphoid malignancies.

September 2012 • 200 pp. • Hardcover • 978-1-936287-78-9

E-book ISBN 978-1-617051-31-9 • $86.00 / $72.25

Prostate Cancer

Guest Editor: James L. Gulley, MD, PhD, FACP, Director, Clinical Immunotherapy Group, Senior Investigator, National Cancer Institute

A DOODY’S CORE TITLE 2012
★★★★ Stars! “...A great resource for balanced perspectives on current concepts and treatments for all stages of the disease.”

With contributions from experts across the United States and Canada, Prostate Cancer details the current management of prostate cancer and reviews new therapies in development for prostate cancer, with an emphasis on castration-resistant prostate cancer (CRPC). Coverage includes discussion of multiple new agents that have been shown to impact overall survival or improve skeletal-related events in metastatic CRPC as well as articles covering new data on screening and prevention, integration of surgery and radiation with newly emerging medical therapies, and coverage of the newest developments in immunotherapy. This book is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.

May 2012 • 200 pp. • Hardcover • 978-1-936287-52-9 • E-book ISBN 978-1-617050-97-8 • $86.00 / $72.25
A New Cutting-Edge Review Publication in Cancer Therapeutics

Leukemia
Guest Editor: Udair R. Popat, MD, Associate Professor, Department of Stem Cell Transplantation, Division of Cancer Medicine, University of Texas M. D. Anderson Cancer Center, Houston, TX

“This is a great resource for students, fellows, and clinicians with an interest in leukemia. It offers an important alternative to the less concise textbooks and less in-depth journal review articles on leukemia.” —Doody’s Reviews

2011 • 200 pp • Hardcover • 978-1-935281-42-9 • E-book ISBN 978-1-935281-43-6 • $89.00 / $72.25

Renal Cancer
Guest Editor: Walter M. Stadler, MD, Fred C. Buffet Professor of Medicine and Surgery, Associate Dean for Clinical Research, Director, Genitourinary Program, The University of Chicago Medical Center

Renal cancer treatment has undergone major changes over the course of the past few years and Renal Cancer addresses current best practices in the light of the most recent evidence. All of the chapters are written by international experts in the field, address the common clinical scenarios in renal cancer and are multidisciplinary in scope covering surgical, medical, and radiation therapy. Chapters examining emerging and novel therapeutic targets, and the management of both CNS, and skeletal metastases in renal cancer round out the coverage.

2011 • 200 pp • Hardcover • 978-1-935281-49-7 • E-book ISBN 978-1-935281-49-7 • $86.00 / $72.25

Breast Cancer
Guest Editor: Antoinette R. Tan, MD, MHSc, Assistant Professor of Medicine, The Cancer Institute of New Jersey

“The book highlights all current aspects of breast cancer management (imaging, surgery, radiotherapy, and chemotherapy). The book is particularly good at summarizing the relevant and important clinical studies. Overall, this book does an excellent job of presenting current research studies in an easy to read format.” —Doody’s Reviews

2010 • 200 pp • Hardcover • 978-1-936287-14-7 • E-book ISBN 978-1-617050-43-5 • $89.00 / $75.65

Multiple Myeloma
Guest Editor: Shaji Kumar, MD, Associate Professor of Medicine, Division of Hematology, Mayo Clinic, Rochester

“...Provide up-to-date, detailed information on myeloma. Important points are covered...Suitable for busy practitioners who want a quick overview of selected topics.” —Doody’s Reviews

Management options and outcomes for individuals with multiple myelomas, have improved dramatically with the introduction of chemotherapy. Even further improvements in prognosis have occurred because of the introduction of newer therapies such as pulse corticosteroids, thalidomide, bortezomib, and autologous and allogeneic stem cell transplantation.

The clinician is better placed to offer effective therapy but at the same time is challenged to keep abreast of the rapidly changing treatment landscape and the newly emerging data. Multiple Myeloma provides a comprehensive and in-depth review of this group of malignancies.

2010 • 176 pp • Hardcover • 978-1-935281-45-0 • E-book ISBN 978-1-935281-45-0 • $89.00 / $75.65

Gastrointestinal Malignancies
Guest Editor: M. Wasif Saif, MD, MBBS, Associate Professor of Medicine, Medical Oncology, Director, GI Cancers Program, Yale Cancer Center, Yale University School of Medicine Professor of Medicine

“A clinically useful and concise review of a range of current and emerging therapies for gastrointestinal malignancies is presented in this book.” —Doody’s Reviews

Gastrointestinal Malignancies provides a comprehensive and in-depth review of this group of malignancies. This volume reviews the current literature, provides critical evaluations of the data, and offers evidence-based recommendations. The chapters update the current screening tools for colon cancers, assessment of predictive markers such as k-Ras and BRAF in the management of colon cancer as well as the state-of-the-art for use of both cytotoxic chemotherapy and the incorporation of newer biological therapies.

2010 • 196 pp • Hardcover • 978-1-935281-43-6 • E-book ISBN 978-1-935281-43-6 • $89.00 / $75.65
Current Multidisciplinary Oncology

A New Resource That Will Aid in the Multidisciplinary Approach to Solid Tumors

Current Multidisciplinary Oncology
SERIES EDITOR: Charles R. Thomas, Jr., MD, Professor and Chairman, Department of Radiation Medicine, and Professor of Hematology/Oncology, Knight Cancer Institute, Oregon Health Sciences University

The Current Multidisciplinary Oncology series consolidates and integrates the varied aspects of multidisciplinary care for major topics in oncology, including breast, lung, prostate, head and neck, and more.

The volumes in the Current Multidisciplinary Oncology series represent all related topic areas, including oncology, radiation oncology, pain, pathology, imaging, psychological support, and the primary disease. In addition, each volume include a chapter focusing on special populations and the disease’s impact/difference on them, discussion of Future Directions and Quality of Life issues, and each volume a chapter written by a private practice oncologist.

Breast Cancer
A Multidisciplinary Approach to Diagnosis and Management
Alphonse G. Taghian, MD, PhD, Associate Professor of Radiation Oncology, Harvard Medical School, Chief of Breast Service, Massachusetts General Hospital, Barbara L. Smith, MD, PhD, Associate Professor of Surgery, Harvard Medical School, Director, Breast Program, Massachusetts General Hospital, and John R. Erban, MD, Associate Professor of Medicine, Harvard Medical School, Director, Clinical Programs and Co-Director, Gillette Center for Breast Cancer, Massachusetts General Hospital

“...very informative and well-structured monograph on breast cancer care. It presents both referenced tables and online resources to make this a very good resource for caregivers.” —International Journal of Radiation, biology, Physics, Volume 78, No. 2

"...Very informative and well-structured monograph on breast cancer care. In summary, this textbook is very informative and is current with the contemporary status of breast cancer care. It presents both referenced tables and online resources to make this a very good resource for caregivers.” —The ASC Bulletin, Volume XLVII, Number 6, November 2010

Over the course of the last decade, the treatment of breast cancer has evolved quite rapidly. New scientific and clinical advances have modified the standard of care and led to improved patient outcomes. At the same time, the treatment of breast cancer has become increasingly complex, requiring the comprehensive review and assessment of multiple issues, genetics, radiology, surgery, reconstruction, fertility radiation, chemotherapy, and more. As a result the harmony and open communication between these specialties facilitated by a multidisciplinary team approach are crucial in providing the best care to patients and ensuring successful treatment.

Breast Cancer, by a multidisciplinary team of authors representing a range of disciplines, is a review for physicians, fellows, nurses physician assistants, physical therapists, and all health care providers involved in the treatment of breast cancer. Breast Cancer summarizes the state-of-the-art issues related to the treatment of breast cancer and describes an approach for optimal multidisciplinary care for individuals who are at higher risk of or who have been diagnosed with breast cancer.

Lung Cancer
A Multidisciplinary Approach to Diagnosis and Management
Kemp H. Kernstine, MD, PhD, Professor of Surgery, Chairman, Division of Thoracic Surgery, Robert Tucker Hayes Distinguished Chair in Cardiothoracic Surgery, University of Texas, Southwestern School of Medicine and Karen L. Reckamp, MD MS, Assistant Professor of Medicine, Department of Medical Oncology & Experimental Therapeutics and Hematology & Hematopoietic Cell Transplant, City of Hope Comprehensive Cancer Center and Beckman Research Institute

“Overall, the editors have assembled a useful reference that reviews the concepts essential to lung cancer management. As oncology continues to evolve into a number of disease subspecialties, resources like this will be increasingly valuable to all healthcare professionals involved in the care of cancer patients.”—Doody’s Reviews

Over the course of the last decade, the treatment of lung cancer has evolved quite rapidly. New scientific and clinical advances have modified the standard care and led to improved patient outcomes. At the same time, the treatment of lung cancer has become increasingly complex, requiring the comprehensive review and assessment of multiple issues, genetics, radiology, surgery, reconstruction, fertility radiation, chemotherapy, and more. **Principles and Practice of Neuro-Oncology**
A Multidisciplinary Approach to Diagnosis and Management

EDITOR-IN-CHIEF: Mineesh P. Mehta, MD, FASTRO, Professor, Department of Human Oncology, University of Wisconsin

EDITORS: Susan M. Chang, MD, Professor, Vice Chair of Neurological Surgery, Director, Division of Neuro-Oncology, University of California San Francisco, Abhijit Guha, MSc, MD, FRCS, FACS, Professor of Surgery (Neurosurgery), Toronto Western Hospital, Hudson Chair in Neuro-Oncology, University of Toronto, Herbert B. Newton, MD, FAAN, Professor of Neurology, Neurosurgery, and Oncology, Esther Dardinger Endowed Chair in Neuro-Oncology, Department of Neurosurgery, Dardinger, Neuro-Oncology Center, Ohio State University Medical Center and Michael A. Vogelbaum, MD, PhD, FACS, The Robert and Kathryn Lamborn Chair for Neuro-Oncology, Department of Neurological Surgery, Cleveland Clinic Neuro-oncologic (brain and spine) cancers account for 19,000 new cases and 13,000 deaths per year. The early and proper diagnosis of these virulent cancers is critical to patient outcomes and diagnosis and treatment strategies are continually evolving. The multidisciplinary team that manages these patients involves medical and radiation oncology, neurosurgery, neuroimaging, nurses and therapists.

"***4 Stars*** This is an excellent book on neuro-oncology. It is more comprehensive and is a better review of the current understanding of CNS tumors and their multidisciplinary management options. It is appropriate for most large academic libraries, as well as all departments with a focus on neuro-oncology." —Doody's Reviews

**Handbook of Treatment Planning in Radiation Oncology**
Gregory M.M. Videtic, MD, CM, FRCP, Residency Program Director, and Associate Professor of Medicine, Department of Radiation Oncology, and Andrew D. Vassil, MD, Resident Physician, Department of Radiation Oncology, both of the Cleveland Clinic Foundation

"This is a convenient reference for residents to carry. It is also a good review for professional examinations. This book is unique in its concise and comprehensive coverage of almost all aspects of radiation therapy planning. It can be read start to finish, but it also is useful in day-to-day practice as a quick reference." —Doody's Reviews

"Compared with other handbooks, the book is unique since it is concise and fully covers almost all the necessary aspects. The authors wrote the book for the primary audience of oncology residents...can also serve as a good and quick reference for medical physics residents, dosimetry students, therapist students, or trainees. —Medical Physics, Volume 39, Issue 4, April 2012

**Multidisciplinary Management of Head and Neck Cancer**
Robert I. Haddad, MD, Clinical Director, Head and Neck Oncology, Dana Farber Cancer Institute, Harvard Medical School.

The treatment of head and neck cancer is extremely challenging and involves insight and expertise from multiple disciplines. Multidisciplinary Management of Head and Neck Cancer is a comprehensive textbook looking at different aspects of head and neck cancer, including the diagnosis, treatment, and outcomes for patients with this disease. The chapters written by world-renowned experts cover the entire discipline of head and neck oncology and include discussion of the role of HPV infections, advances in radiotherapy, new surgical techniques, novel agents in thyroid therapy and more. The book is designed to be both practical and comprehensive for the physicians treating this complex disease.

**FEATURES OF MULTIDISCIPLINARY MANAGEMENT OF HEAD AND NECK CANCER INCLUDE:**
- A chapter on the role of HPV infections in head and neck cancer
- A chapter on new advances in radiotherapy for head and neck cancer, including review of IMRT, new standards and potential pitfalls
- Detailed discussion of the role of chemotherapy in head and neck cancer, including commonly used drugs and how to combine them with radiotherapy to improve patient outcomes
- Detailed discussion on incorporating novel agents with radiotherapy
- Detailed discussion of novel therapeutics in head and neck cancer, including new drugs and biologics

Radiation Medicine Rounds

A New Cutting-Edge Review Publication in Radiation Medicine

EDITOR-IN-CHIEF: Charles R. Thomas, Jr., MD, Professor and Chairman, Department of Radiation Medicine, and Professor of Hematology/Oncology, Knight Cancer Institute, Oregon Health Sciences University

Published three times a year Radiation Medicine Rounds provides authoritative, thorough assessments of a wide range of “hot topics” and emerging new data for the entire specialty of radiation medicine. Radiation Medicine Rounds is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.

FEATURES OF RADIATION MEDICINE INCLUDE:
△ In-depth, up-to-date expert reviews and analysis of major new developments in all areas of Radiation Medicine
△ Each issue edited by an authority in that subject area
△ Each issue focused on a single major topic in Radiation Medicine, providing coverage of advances in radiation science, radiation medicine technology, radiation medicine practice, and assessment of recent quality and outcome studies.

Hematologic Malignancies

Guest Editors: Michael Tomblyn, MD, MS Assistant Member Radiation Oncology Moffitt Cancer Center & Research Institute, Tampa FL, Karen Winkfield, MD, PhD, Hematologic Malignancies Service, Department of Radiation Oncology, Massachusetts General Hospital; Bouthaina S. Dabaja, MD, Associate Professor, Department of Radiation Oncology, Division of Radiation Oncology, The University of Texas MD Anderson Cancer Center, Houston, TX

Authoritative reviews and updates discuss recent advances in radiation therapy in treatment of Hodgkin lymphoma, B-cell nodal and extranodal lymphomas, follicular lymphoma and cutaneous T-cell lymphoma; mantle cell lymphoma, and leukemia. In addition, reviews of current developments in PET imaging in lymphoma, radioimmunotherapy, and radiation and transplant, are included. This volume of Radiation Medicine Rounds gives the radiation oncology professional a complete overview of current best practice and emerging modalities for radiation treatment of hematologic malignancies.

December 2012 • 224 pp. • Hardcover • 978-1-936287-77-2 • E-book ISBN 978-1-617051-49-4 • $85.00 / $72.25

Malignant Gliomas

Guest Editors: Arnab Chakravarti, MD, Chair and Professor, Department of Radiation Oncology Max Morehouse Chair of Cancer Research, Co-Director, Brain Tumor Program, Arthur G. James Comprehensive Cancer Center and Richard L. Solove Research Institute, The Ohio State University Medical School and Martin Fuss, MD, Professor and Vice Chair, Director Program in Image-guided Radiation Therapy, Department of Radiation Medicine, Oregon Health & Science University

Malignant Gliomas provides a multidisciplinary update on the treatment of the complex area of malignant gliomas. Authoritative reviews and updates discuss recent advances in radiation therapy including coverage of emerging areas such as BNCT, proton therapy and brachytherapy applications in malignant glioma treatment. In addition, reviews of current developments in advanced and metabolic imaging, neuropathology, surgical approaches, anti-angiogenesis, kinase inhibitors, biomarkers and genetic therapy are included. This volume of Radiation Medicine Rounds will give the radiation oncology professional a complete overview of current best practices and emerging modalities for treatment of these difficult tumors.

September 2012 • 200 pp. • Hardcover • ISBN13 978-1-936287-78-9
E-book ISBN 978-1-617051-31-9 • $85.00 / $72.25

Breast Cancer

Guest Editor: Alphonse Taghian, MD, Associate Professor of Radiation Oncology, Massachusetts General Hospital, Boston, MA and Michele Y. Halyard, MD, Associate Professor of Oncology, Department of Radiation Oncology, Mayo Clinic - Scottsdale, AZ

This issue of Radiation Medicine Rounds discusses the more salient topics surrounding the role of radiation therapy in breast cancer. The specialty of radiation therapy has increased in complexity over the years, yet as technology improves, the goal of improving outcomes while decreasing toxicity remains critical. Breast Cancer provides the practitioner with a full current overview of the present best practices and recent research in management of this complex and challenging cancer.

April 2012 • 192 pp. • Hardcover • 978-1-936287-65-9 • E-book ISBN 978-1-617050-43-5 • $85.00 / $72.25

Gynecologic Cancer

Arno J. Mundt, MD, Professor and Chair, Department of Radiation Oncology, Catheryn Yashar, MD, Associate Professor, Chief of Breast and Gynecologic Radiation Services, Director of Medical School Education, Department of Radiation Oncology, Loren Mell, MD, Assistant Professor of Radiation Oncology, Department of Radiation Oncology, all of University of California, San Diego

With contributions from experts across the U.S., Gynecologic Cancer details the current management of different types of gynecologic cancer. Today the management of gynecologic cancers is multidisciplinary in nature, requiring close collaboration between gynecologic oncologists, medical oncologists, and radiation oncologists. Gynecologic Cancer reviews new therapies in use and under development for gynecologic cancer including novel radiation approaches, the role of chemotherapy and novel biologic agents, new and emerging surgical approaches, and the role of MRI in assessing tumor response in cervical cancer patients.

Radiation Medicine Rounds

**Head and Neck Cancer**
Guest Editors: Dwight E. Heron, MD, FACRO, Associate Professor of Radiation Oncology at the University of Pittsburgh School of Medicine, and Roy B. Tishler, MD, PhD, Associate Professor of Radiation Oncology, Harvard Medical School

This volume of *Radiation Medicine Rounds* examines the latest advances in the use of radiation medicine in treatment of head and neck cancer. Head and neck cancer treatment has undergone major change over the course of the past few years and *Head and Neck Cancer* addresses current best practices in the light of the most recent evidence. All of the chapters are written by international experts in the field, address the common clinical scenarios in head and neck cancer and are multidisciplinary in scope. Chapters examining health services in head and neck cancer as well as factors influencing clinical decisions round out the coverage.

2011 • 172 pp • Hardcover • 978-1-936287-36-9 • E-book ISBN • 978-1-617050-71-8 • $85.00 / $72.25

**Prostate Cancer**
Guest Editors: Allen M. Chen, MD, Assistant Professor and Director, Residency and Fellowship Training Program, Department of Radiation Oncology, UC Davis Medical Center, and Srinivasan Vijayakumar, MD, DMRT, FACR, Department Chair and Professor, Department of Radiation Oncology, University of Mississippi Medical Center

“‘This well-composed collection of papers certainly will give readers with useful information about prostate therapy – the past, present, and future.’—Doody’s Reviews

2011 • 184 pp • Hardcover • 978-1-936287-33-8 • E-book ISBN • 978-1-617050-67-1 • $85.00 / $72.25

Prostate cancer is the most common cancer in males and radiation therapy is a major tool in the management of the disease. *Prostate Cancer* includes reviews of all major recent advances in treatment of favorable, intermediate and high-risk prostate cancer as well as newer modalities such as brachytherapy, stereotactic body radiation therapy, and proton beam radiotherapy. Articles also review current knowledge in the areas of new biomarkers, risk stratification, and risk stratification. This volume provides the practitioner with a full current overview of the present best practices and recent research in management of this complex and challenging disease.

2010 • 200 pp • Hardcover • 978-1-936287-15-4 • E-book ISBN • 978-1-617050-44-2 • $89.00 / $75.65

---

**Lower Gastrointestinal Malignancies**
Guest Editors: Edgar Ben-Josef, MD, Associate Professor, Department of Radiation Oncology, University of Michigan Medical Center, and Albert Koong, MD, PhD, Assistant Professor, Department of Radiation Oncology, Stanford University

Includes chapters on the evolution of systemic agents, neoadjuvant treatment, radiation therapy, chemoradiation therapy, rectal cancer and anal cancer covering the vast majority of these tumors. The multidisciplinary nature of the articles provides readers with an up-to-date summary and a well-rounded review regarding these tumors and their care.

2010 • 184 pp • Hardcover • 978-1-933864-92-1 • E-book ISBN • 978-1-935281-46-7 • $89.00 / $75.65

**Thoracic Malignancies**
Guest Editor: Steven E. Schild, MD, Professor and Chairman, Department of Radiation Oncology, Mayo Clinic, Scottsdale

Included are chapters on lung cancer, esophageal cancer, and thymomas providing coverage of the vast majority of thoracic tumors. The multidisciplinary nature of the articles provides readers with an up-to-date summary and a well-rounded review regarding these tumors and their care.

2010 • 248 pp • Hardcover • 978-1-933864-89-1 • E-book ISBN • 978-1-935281-80-1 • $89.00 / $75.65
Biliary Tract and Gallbladder Cancer: Diagnosis and Therapy
Charles R. Thomas, Jr, MD, Professor and Chairman of the Department of Radiation Medicine, Oregon Health & Science University. Clifton David Fuller, MD, Department of Radiation Oncology, The University of Texas Health Science Center at San Antonio

“...an excellent choice for any physician seeking a comprehensive, multidisciplinary, and cutting-edge review of biliary tract and gallbladder cancer.” —Uzma D. Siddiqui, MD, Journal of Clinical Gastroenterology, Volume 43, Number 9, October 2009

“This is an excellent resource. It is well written and tightly edited. It should be in every large institutional resource library and would be an invaluable tool for medical and surgical oncology fellows and radiation oncology residents.” —Doody’s Reviews

Combining Targeted Biological Agents with Radiotherapy: Current Status and Future Directions
William Small, Jr, MD, Professor of Radiation Oncology and Vice-Chairman of the Department of Radiation Oncology, Northwestern University

“...comprehensive reviews of current studies and planned studies...well-written.” —Doody’s Reviews

Cancer Rehabilitation
Principles and Practice
Michael D. Stubblefield, MD, Assistant Professor of Rehabilitation Medicine, Weill Medical College of Cornell, University Rehabilitation Medicine Service, Memorial Sloan-Kettering Cancer Center and Michael O’Dell, MD, Chief of Clinical Services, Department of Rehabilitation Medicine New York-Presbyterian Hospital/Weill Cornell Medical Center. Professor of Clinical Rehabilitation Medicine, Weill Cornell Medical College

“This book is a must-have for clinicians who wish to specialize in cancer rehabilitation.” —Doody’s Reviews

“This book is a milestone and must-have for anyone involved in the care of those with cancer.” —American Journal of Physical Medicine and Rehabilitation

“...excellent accounts of cancer syndromes causing physical disability and pain, and well-done matched chapters that describe wider therapeutic approaches to help patients with these syndromes.” —International Journal of Radiation Oncology, Biology, and Physiology, Vol. 77, No. 5

Oncology Clinical Trials
Principles, Design, and Analysis
William Kevin Kelly, DO, Professor of Medical Oncology, Jefferson Medical College, and Susan Halabi, PhD, Associate Professor, Department of Biostatistics and Bioinformatics, Duke University Medical Center

Oncology Clinical Trials provides a comprehensive guide for both early-career and senior oncology investigators into the successful design, conduct and analysis of an oncology clinical trial. Oncology Clinical Trials covers how to formulate a study question, selecting a study population, study design of Phase I, II, and III trials, toxicity monitoring, data analysis and reporting, use of genomics, cost-effectiveness analysis, systemic review and meta-analysis, and many other issues. Many examples of real-life flaws in clinical trials that have been reported in the literature are included throughout.

2010 • 448 pp • Hardcover • 978-1-93864-38-9 • E-book ISBN • 978-1-935281-76-4 • $135.00 / $110.50

Esophageal Cancer
Principles and Practice
Blair A. Jobe, MD, Associate Professor of Surgery, University of Pittsburgh Medical Center, Charles R. Thomas, Jr., MD, Professor and Chairman of the Department of Radiation Medicine, Professor of Hematology/Oncology, Knight Cancer Institute, Oregon Health Sciences University, John G. Hunter, MD, Chairman of the Department Of Surgery at Oregon Health Sciences University

“It is a single, comprehensive source for current information regarding the biology, staging, and treatment of esophageal cancer, as well as an excellent guide to the management of patients suffering from this disease.”

—International Journal of Radiation Oncology Biology and Physics, Vol. 75, No. 5

“It is truly a well-written, practical, comprehensive text. It should serve as a helpful, handy reference to anyone involved in the treatment of this disease.”

—Gastrointestinal Cancer Research, January/February 2011, Volume 4, Issue 1

2010 • 848 pp • Hardcover • 978-1-93864-17-4 • E-book ISBN • 978-1-935281-17-7 • $218.95 / $174.25

Lymph Nodes

Steven H. Kroft, MD, Professor of Pathology, Vice Chair of Clinical Pathology, Department of Pathology, University of Vermont; Jannek Lamovec, MD, Assistant Professor of Pathology, Medical University of Graz; Horatia Oltmann, MD, PhD, Assistant Professor of Pathology, Medical College of Wisconsin; and Richard Prayson, MD, Section Head for Neuropathology, Cleveland Clinic Main Campus, Cleveland, OH, and Professor of Pathology, Case Western Reserve University, School of Medicine

Lymph Nodes presents the full gamut of key lymph nodes disorder entities and diagnoses that a practitioner can expect to encounter in daily practice.

October 2012 • 208 pp. • Softcover • 978-1-936287-08-6 • $75.00 / $63.75

Brain Tumors

Richard Pryason, MD, Section Head for Neuropathology at Cleveland Clinic Main Campus, Cleveland, OH, Bette Kleinschmidt-DeMasters, MD, Head of Neuropathology at the University of Colorado, Denver, and Professor of Pathology at the University of Colorado, Denver School of Medicine, Mark Cohen, MD, Director of the Division of Neuropathology, University of Cleveland and Professor of Pathology, Case Western Reserve University, School of Medicine

Surgical neuropathology is a challenging arena for many pathologists, due in large part to a relative lack of experience of most pathologists in this area compared to other areas of surgical pathology. Brain Tumors is intended to address this need with cases drawn from the surgical neuropathology practices of the authors.

This volume provides examples of over 100 brain tumors, running the gamut from the very common to the rare. Each example is presented in a case based format and the wide variety of cases presented covers the entire scope of brain tumors and offers the opportunity to review both the basics of the beginner or relatively inexperience pathologist and also offers experienced pathologists the chance to see some of the rare entities.

2010 • 318 pp • Hardcover • 978-1-933864-69-3 • E-book ISBN 978-1-935281-36-8 • $145.00 / $123.25

Inflammatory Skin Disorders

Jose A. Plaza, MD, Assistant Professor of Pathology, Department of Dermatology, University of Wisconsin; G. Prieto, MD, PhD, Professor of Pathology and Dermatology, Section Chief, Department of Dermatology, University of Wisconsin; and Victor Prieto, MD, PhD, Assistant Professor of Dermatology, Department of Dermatology, University of Wisconsin

Inflammatory Skin Disorders, the third volume in the Demos Surgical Pathology Guides Series provides essential information on a range of key inflammatory skin diagnoses, including but not limited to those that pathologists commonly see in daily practice.

January 2012 • 274 pp. • Softcover • 978-1-933864-87-7

E-book ISBN 978-1-935281-96-2 • $75.00 / $63.75

Breast Pathology

Giovanni Falconieri, MD, Department of Pathology General University Hospital, Udine, Italy; Janek Lamovec, MD, Professor of Pathology, Department of Pathology, Institute of Oncology, Ljubljana, Slovenia; and Abiy B. Ambaye, MD, Associate Professor, Department of Pathology, University of Vermont

Breast Pathology provides essential information on a range of key breast entities and diagnoses. Traditional morphology, coupled with clinical data, is emphasized, and each chapter is complemented with as many photographs as possible, including macroscopic images.

October 2011 • 200 pp. • Softcover • 978-1-936287-30-7

E-book ISBN 978-1-617050-20-4 • $75.00 / $63.75

Head and Neck Pathology

Paul E. Wakhely, MD, Professor of Pathology, Department of Pathology, The Ohio State University Medical Center

Head and Neck Pathology concentrates on the salient H&E histopathology of each entity discussed with brief descriptors of the clinical features, differential diagnosis, and relevant literature references for each entity. The book features a bulleted format with H&E illustrations to match histopathologic criteria.

2011 • 208 pp. • Softcover • 978-1-933864-84-6

E-book ISBN 978-1-617050-24-4 • $75.00 / $63.75

Effusion Cytology

A Practical Guide to Cancer Diagnosis

Parvin Ganjei-azar, MD, Professor of Pathology, Director of Cytology Laboratories, Jackson Memorial Health System, Sylvester Comprehensive Cancer Center, Director of the Cytopathology Fellowship Program, Department of Pathology, Miller School of Medicine, University of Miami, Miami, Florida, Mercé Jordá, PhD, Professor of Pathology, Department of Pathology, Miller School of Medicine, University of Miami, Miami, Florida, Sylvester Comprehensive Cancer Center, University of Miami Hospitals, Miami, Florida, Atwar Krishan, PhD, Professor of Pathology, Department of Pathology, Miller School of Medicine, University of Miami, Miami, Florida

Effusion Cytology is a practical manual in diagnosis and interpretation of body cavity fluid (BCF) specimens. This highly illustrated volume provides handy information for residents, fellows, and general pathologists with a step-by-step guide to evaluation of BCF specimens with the specific goal of identification of malignancies. Use of ancillary techniques such as immunocytochemistry is discussed where appropriate. Special attention is given to the formulation of final cytopathology reports of the diagnosis of difficult cases.

2011 • 192 pp • Softcover • 978-1-935281-41-2 • $85.00 / $72.25

Metastatic Carcinomas of Unknown Origin

Mark R. Wick, MD, Professor of Pathology, University of Virginia Health System

“...this is a unique and concise textbook that incorporates a framework for how to approach metastatic carcinomas of unknown origin. It covers the spectrum of presentation of these lesions through treatment and postmortem validation.”

—The ASC Bulletin, Volume XLVII, Number 6, November 2010

Metastatic Carcinomas of Unknown Origin is the first comprehensive, fully illustrated discussion of the clinical features, pathologic attributes, and treatment approaches of metastatic carcinomas of unknown origin (MCUOs). This unique text provides a framework for approaching these complex issues, with contributions from international experts in the field of MCUOs.

2008 • 280 pp • Hardcover • 978-1-933864-32-7

E-book ISBN 978-1-935281-01-6 • $180.00 / $153.00

Of Related Interest to Oncologists

Demos Surgical Pathology Guides

Editor-in-Chief: Saul Suster, MD, Professor and Chairman, Department of Pathology and Laboratory Medicine, Medical College of Wisconsin

The Demos Surgical Pathology Guides Series presents in summary and visual form the basic knowledge base practicing pathologists need. Series volumes cover the major specialty areas of surgical pathology, and coverage emphasizes key entities and diagnoses. Emphasis is on basic morphology with newer techniques represented where they are frequently used. An additional feature is the “expert tips” from experienced diagnosticians. The series provides a handy summary and quick reference. Experienced practitioners will find the series valuable as a portable “refresher course” or review tool.
